

## STANDARD ON CONTINUING COMPETENCY IN NEONATAL RESUSCITATION

The midwife will hold valid certification in neonatal resuscitation<sup>1</sup>. The required standard of performance is completion of a course that meets the National Guidelines for Neonatal Resuscitation as they apply to the midwife's scope of practice. This certification must be renewed annually.

Where a midwife is a certified NRP instructor they will be considered to have met the above requirements when they provide evidence of having taught at least one NRP course in the previous 12 months.

The midwife will present evidence of having met the requirements upon annual renewal of registration.

*Please note:* It is recommended that midwives refresh neonatal resuscitation skills and knowledge every six (6) months.
